Re: Tug Hill Operating, LLC - Yoho Pad - 103-00074 - R13-3132B

Tug Hill Operating has applied for a Class I Administrative Update to current permit R13-3132A to remove the enclosed combustor based on a lack of any condensate production. Since the changes will result in a significant reduction of emissions, it is the writers opinion that Tug Hill be granted this Class I Administrative Update.
